MAHDI MOHEBI NIA

Full-Stack Software Developer & UI/UX Designer

Kerman, Iran • [Your Email] • [Your Phone] • [Your LinkedIn]

PROFESSIONAL SUMMARY

Innovative and detail-oriented Full-Stack Software Developer and UI/UX Designer with expertise in cross-platform mobile development (Flutter, Dart) and robust web architectures (Next.js, React, TypeScript). Specialized in Clean Architecture, BLoC pattern, and designing scalable Monorepo enterprise ecosystems. Proven ability in Python (FastAPI) backend engineering, IoT integrations, and DevOps processes. Adept at bridging the gap between high-level system architecture and seamless, user-centric interfaces.

CORE COMPETENCIES

- **Frontend & Mobile:** Flutter, Dart, Next.js, React, PWA, TypeScript, Tailwind CSS, UI/UX Design
- **Backend & Infrastructure:** Python, FastAPI, C++, SQLite, Nginx, PostgreSQL, Clean Architecture, Monorepo Management
- **IoT & Methodologies:** Internet of Things (IoT), Arduino, Proteus VSM, Offline-First Architecture, BLoC Pattern, RESTful APIs, WebSockets, DevOps

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer & System Architect *Elevator Ecosystem (A.manage / Shopbot) | Kerman, Iran*

- Architected and deployed an enterprise-grade Monorepo ecosystem integrating a Next.js/FastAPI customer web portal and a Flutter-based operational mobile app for field technicians.
- Implemented Clean Architecture and the BLoC pattern across the Flutter app, ensuring a scalable, offline-first experience with complex offline queuing (FIFO) and fail-safe mechanisms.
- Engineered a "Single Source of Truth" backend strategy using PostgreSQL and FastAPI, unifying data models and seamlessly synchronizing external lead-generation data with internal operational hubs.
- Developed robust Role-Based Access Control (RBAC) and implemented strict JWT-based authentication security using FlutterSecureStorage.
- Designed comprehensive UI/UX workflows, ensuring native RTL support, Vazirmatn typography, and seamless end-to-end data integration.

Full-Stack Web Developer & UI/UX Designer *Asanro Etminan Amir Kerman | Kerman, Iran*

- Built and launched a robust web frontend platform for an elevator installation, servicing, and parts enterprise.
- Utilized Next.js, React, TypeScript, and Tailwind CSS to deliver a highly performant and responsive application.
- Translated brand requirements into a premium corporate aesthetic, incorporating dark navy blue and gold visual styling with optimized Vazirmatn typography.

PROJECTS & TECHNICAL ACHIEVEMENTS

- **TaskFlow (Productivity Application):** Designed and developed a high-performance task management application built entirely with Flutter (Dart) for both frontend UI/UX and local backend logic, featuring reactive state management and robust data handling.
- **Automated Reporting Scripts:** Developed Python 3.12 automation and PDF generation scripts on Windows, streamlining business reporting and operational logging.
- **Video Production Workflows:** Designed professional video recording setups using Apple Log, Blackmagic Camera, softbox lighting, and advanced color grading (CapCut/Premiere) for social media content.

EDUCATION

B.Sc. in Computer Engineering *Vali-e-Asr University of Rafsanjan, 2026*

- **Bachelor's Thesis:** Monitoring and Controlling Elevator Status via Arduino and Flutter in a Simulation Environment.
- Engineered an IoT telemetry architecture utilizing C++ (Arduino Edge Node) for high-speed signal extraction via bit-masking and static JSON serialization to prevent memory fragmentation.
- Developed a cross-platform Flutter application (Dart) with reactive state management and WebSocket integration for real-time fault monitoring with sub-50ms latency.
- Validated the complete end-to-end hardware and network ecosystem using Proteus VSM.
